

Jackge project

whitepaper

Decentralized safe haven
cryptocurrency

Smart contract

total supply: 1 billion

why just 1 billion?

We want give the best value possible to the coins.

This supply allows more stability and growing possibilities.

Jackge is a decentralized deflationary smart contract that applies 5% fee to every transaction.

This percentage is splitted in this way:

- ◇ 3% automatically burn
- ◇ 2% goes in the liquidity pool

Jackge token

at the start we will not renounce the ownership of the coin, because we want to decrease the fees in order to go on various exchanges.

We will renounce the ownership only once that is done.

Our smart contract is created for the purpose of decreasing the supply over time thanks to its hyper deflation.

At every transaction the 3% will be send to a burn address.

This will allow to increase more liquidity pool at every transaction, that creates a support floor in the coin.

There will be a manual burn for a number of holders achieved.

For every 1000 holders will be burned 1% of the coin, until we reach the 20% of the total supply.

tokenomics

the tokenomics are slipped in this way:

- ◇45% presale liquidity pool
- ◇20% burn (1% every 1000 holders)
- ◇5% team wallet
- ◇9% exchanges/marketing
- ◇1% airdrop
- ◇20% reserve locked for 1 year

community

we want to be the most transparent as possible with all of you, we thrive to create a big community that helps each other.

For us the idea of creating a strong community is the most important thing and the most iconic goal we can reach with jackge.

While we continue to build our goals, there will be constant transparency with the whole community.

The social media in use are: twitter, telegram, instagram,

jackge team, will often create contest to win a baggy of jackge.

the contests will be focused on how much can you spam jackge, or make the best video, or the best meme.

the jackge user that reach the most like win.

Roadmap

q3 2021:

- team creation
- refine social medias
- deploying smart contract
- website creation

q4 2021:

- hard marketing
- listing on coinhunt, coinsniper etc..
- improve graphic content
- presale on dxsale

q1 2022:

- Token launch on pancakeswap
- coinmarketcap and coingecko listing
- designate influencer ambassador
- JACKge meme contest
- listing minor exchanges

q2 2022:

- jackge (jkge) airdrop
- listing on major exchanges
- big partnership
- constant marketing
- big meme contest between influencers

q3 2022:

- binance listing
- jackge demo videogame
- elon musk forget doge
